

CANDIDATE TO THE BOARD

Full Name*: Jeff Jianfeng YAO

Nationality*: French

Children's Class*: CP and CE1

Experience/Areas of Expertise*:

After graduating from high school in Jiangsu, China, I studied and worked in France for more than 20 years before moving to Hong Kong in 2010. As a university professor in mathematics, I am in daily contact with young students and academic research. I have accumulated a long experience in both French and Hong Kong education systems. Also my personal journey so far shared between mainland China, France and Hong Kong has forged my multicultural vision of the world.

What I hope to bring to the Board of Directors* (12 lines max.):

As a member of the board of directors, I would favor two objectives. First, given the great cultural diversity within the families of the parents of the school, I would like to provoke more exchange and interaction between these different families so that the school and our children derive a greater benefit. For example, more activities will be proposed to our parents and students on Chinese and Asian cultures, exploiting the richness already present in Hong Kong in this field. Another subject that is important to me is to strengthen the links between the FIS and the Hong Kong university community. Indeed Hong Kong has several leading universities with many renowned specialists. Our high school students will be able to learn a lot from these specialist academics.
